## 1. EXECUTIVE SUMMARY

The U.S. Environmental Protection Agency's (EPA) Final Fiscal Year (FY) 2001 Compliance Assistance Activity Plan (Plan) reflects EPA's commitment to help entities comply with regulatory requirements and improve environmental performance through compliance assistance. In this Plan, EPA catalogs a total of 368 compliance assistance activities and projects planned for FY 2001 across ten EPA regions and seven Headquarters offices (See Chart 1). The Plan presents a "snapshot" of the various compliance assistance-related activities and projects that EPA intends to undertake this fiscal year. The Plan does not necessarily capture all of EPA's compliance assistance work such as general mailings, responses to public inquiries and distribution of existing tools. Additional compliance assistance activities may also be undertaken in FY 2001 as new needs are identified.

The information in the Plan can assist states and other compliance assistance providers in determining how to focus their resources, avoid duplication, and complement EPA's efforts. It enables interested stakeholders to understand the Agency's current compliance assistance priorities and activities and enables them to suggest where other tools or additional emphasis are still needed. Additionally, the regulated community will be able to anticipate what compliance assistance will be available to them in the near future. The Plan's comprehensive inventory also allows the EPA to more effectively utilize its own compliance assistance resources. The 368 Plan activities are contained in the Project Inventory Table in Appendix C of this document. This Project Inventory is also accessible on EPA's web-based National Compliance Assistance Clearinghouse at [www.epa.gov/clearinghouse](http://www.epa.gov/clearinghouse).

The Plan inventory contains a wide variety of activities that focus on compliance assistance tools for new regulations, and for existing regulations that present compliance problems. It also includes activities that provide information to help stakeholders understand their regulatory obligations. For example, EPA develops compliance guides for federal regulations that have either a significant impact on a substantial number of small entities or have an economically significant impact of \$100 million or more on the regulated community. In addition to these rule-related compliance guides, the Plan contains a variety of other compliance assistance tools. It includes technical guides, self-audit checklists and protocols, applicability flowcharts and expert systems. In addition the Plan lists overviews of laws/regulations, best management practices, guidance documents, and outreach opportunities such as training, seminars/workshops, mailings, hotlines and new websites.

This Plan is a first step by EPA toward meeting its pledge to provide timely and accessible compliance assistance information, as articulated in the Agency's *Aiming for Excellence* report. When EPA asked stakeholders in early 1999 how it could improve its enforcement and compliance assurance program, they consistently said that EPA needed to provide more timely and accessible compliance assistance. Stakeholders wanted to know what assistance EPA planned to provide and they wanted an opportunity to influence future activities. In response to this stakeholder feedback, the Agency developed this Plan as a means to better inform providers

and stakeholders of EPA's upcoming compliance assistance activities and projects. The Plan has already begun to achieve its goals of eliminating duplication, stimulating collaboration and identifying future compliance assistance opportunities.

Stakeholder feedback was a vital part of the FY2001 Plan development process. Through various mechanisms, including the first EPA-sponsored national compliance assistance providers forum, EPA received public comment and feedback on the overall Plan, individual projects and the Plan development process as well. This input helped EPA in putting together the final FY 2001 Plan and challenged the Agency to design a process for improved and earlier stakeholder involvement which will be used in developing the FY 2002 Compliance Assistance Activity Plan. EPA remains committed to ensuring that early and meaningful stakeholder input will continue to play an integral role in the development of all future compliance assistance plans.

## **2. PLAN DEVELOPMENT**

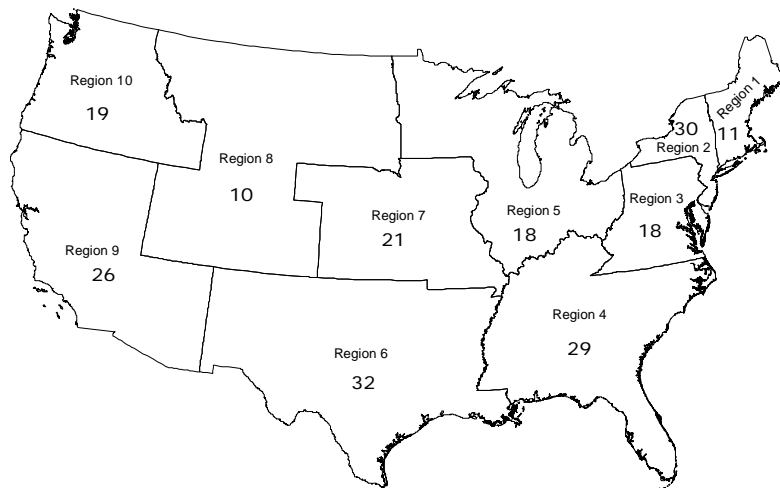

The following goals guided the Agency in developing the Plan which strives to:

- Provide a comprehensive inventory of EPA's planned compliance assistance activities, to help inform stakeholders of the Agency's priorities;
- Ensure that the Agency's compliance assistance resources are used efficiently, and avoid duplication of efforts by working with all appropriate EPA offices and regions;
- Solicit stakeholder input on the Plan activities to help identify where compliance assistance resources are most needed; and
- Identify collaboration or partnership opportunities across the Agency, with other compliance assistance providers, and with the regulated community.

To achieve these goals, the Agency implemented a strategy to ensure broad Agency and external stakeholder involvement. To develop the initial draft, EPA established an Agency-wide workgroup, consisting of regional and headquarters representatives. This Agency workgroup helped clarify the goals of the Plan and developed its scope and format.

**Chart 1: Distribution of FY01 Compliance Assistance Projects Lead Office**

Total: 368 projects

EPA Headquarters	
Lead Office	Projects
OAR	13
OPPTS	35
OECA	50
OSWER	9
OW	6
OEI	24
OPEI	17
TOTAL HQ	154

Source: the Compliance Assistance Planning Database (CAPD) as of February 1, 2001

**NOTE:**

- All offices leading compliance assistance activities provided information on their projects that will continue or commence in FY 2001. Because this is a first time Agency-wide planning effort, it is likely that not all the projects are included in this table.

***This map shows the FY 2001 Compliance Assistance activities distributed by EPA Regional and Program Offices. The number corresponding to each Region or Office represents the number of planned activities for which each respective Regional or Program Office has identified itself as the lead. All Regions are represented and account for 58% of the total projects in the Plan. All Headquarters programs that provide compliance assistance are also represented, with OECA having the largest number of projects.***

EPA also sought outside stakeholder input on its compliance assistance program. Through EPA's National Advisory Council on Environmental Policy and Technology (NACEPT), the Agency created a standing subcommittee — the Compliance Assistance Advisory Committee (CAAC). The CAAC's twenty-one members include representatives from small and large businesses, trade associations, community and environmental groups, and state, local, and tribal governments, as well as other federal agencies. The CAAC's advice and recommendations, which were presented to the Administrator in August 2000, have been an important part of the Plan's development.

The Agency issued the draft FY 2001 Compliance Assistance Plan in March 2000. The Plan contained 299 proposed activities and was based on the President's budget submission for the Agency. The Agency then sought stakeholder input on the draft Plan through its first

Compliance Assistance Providers' Forum, an EPA-sponsored workshop that provided stakeholders with an opportunity to review and comment directly on the Agency's planned activities. The draft FY 2001 Plan also was published in the *Federal Register* for public review and comment.

The process used to develop the Plan helped to build a network of compliance assistance providers inside the Agency and strengthened partnerships both within as well as outside the Agency. The inventory of projects in the draft Plan enabled EPA Headquarters and regional offices to better understand how each of their activities relate to the Agency's overall compliance assistance efforts. Through this process, EPA identified similar types of projects that provide opportunities for collaboration. As a result, EPA regions and offices have been working together to eliminate duplication, create partnerships and recognize gaps for future efforts.

Program improvements yielded by this coordinated strategy have resulted in refinements and improvements to the draft Plan since it was issued in March 2000. The Plan now contains 368 projects, compared to the 299 projects originally proposed, with over 40% of the increase coming from Headquarters office projects. This change came about as a result of collaboration efforts, final budget allocations, shifts in program priorities, more complete reporting within the Agency, and stakeholder input.

### **3. THE PLAN INVENTORY**

The Plan catalogues 368 activities and projects that will commence or conclude in FY 2001. To determine which projects and activities should be included in the Plan, the Agency used the following definition of compliance assistance:

Compliance assistance includes activities, tools or technical assistance that provides clear and consistent information for 1) helping the regulated community understand and meet its obligations under environmental regulations; or 2) compliance assistance providers to aid the regulated community in complying with environmental regulations. Compliance assistance may also help the regulated community find cost-effective ways to comply with regulations and/or go "beyond compliance" through the use of pollution prevention, environmental management practices, and innovative technologies, thus improving their environmental performance. To be categorized as a compliance assistance project or activity, at least one objective must be related to achieving or advancing regulatory compliance.

This definition is derived from the basic operating definition of compliance assistance used within the Office of Enforcement and Compliance Assurance (OECA), the Agency office with lead responsibility for promoting compliance assistance. It has been modified to recognize activities such as the provision of compliance assistance tools to compliance assistance providers (and not just to the regulated community), and innovative approaches to environmental

improvement, such as environmental management systems. Certain EPA activities, particularly voluntary programs such as Green Lights and Wastewise, are not included in the Plan since they do not have a direct link to regulatory compliance requirements.

The Plan inventory contains a wide variety of activities that focus on compliance assistance tools for new regulations, and for existing regulations that present compliance problems. It includes activities that provide information to help stakeholders understand regulatory obligations. Some of the activities were discussed in the *Aiming for Excellence* report, but the current inventory goes beyond what was contemplated in that report.

The Plan also contains information on compliance tools specifically developed for two types of federal regulations. EPA develops compliance guides for federal regulations that have a “significant economic impact on a substantial number of small entities” as defined under the Small Business Regulatory Enforcement Fairness Act (SBREFA). In addition, EPA develops either a compliance guide or a self-audit checklist for federal regulations with an “economically significant” impact of \$100M or more on companies and/or government facilities as outlined in EPA’s *Aiming for Excellence* report. It is EPA’s goal to develop these compliance tools within 90 days of promulgating the final rules for these types of regulations. Appendix A contains a list of the SBREFA and economically significant federal regulations for which EPA plans to develop compliance guides or self-audit checklists.

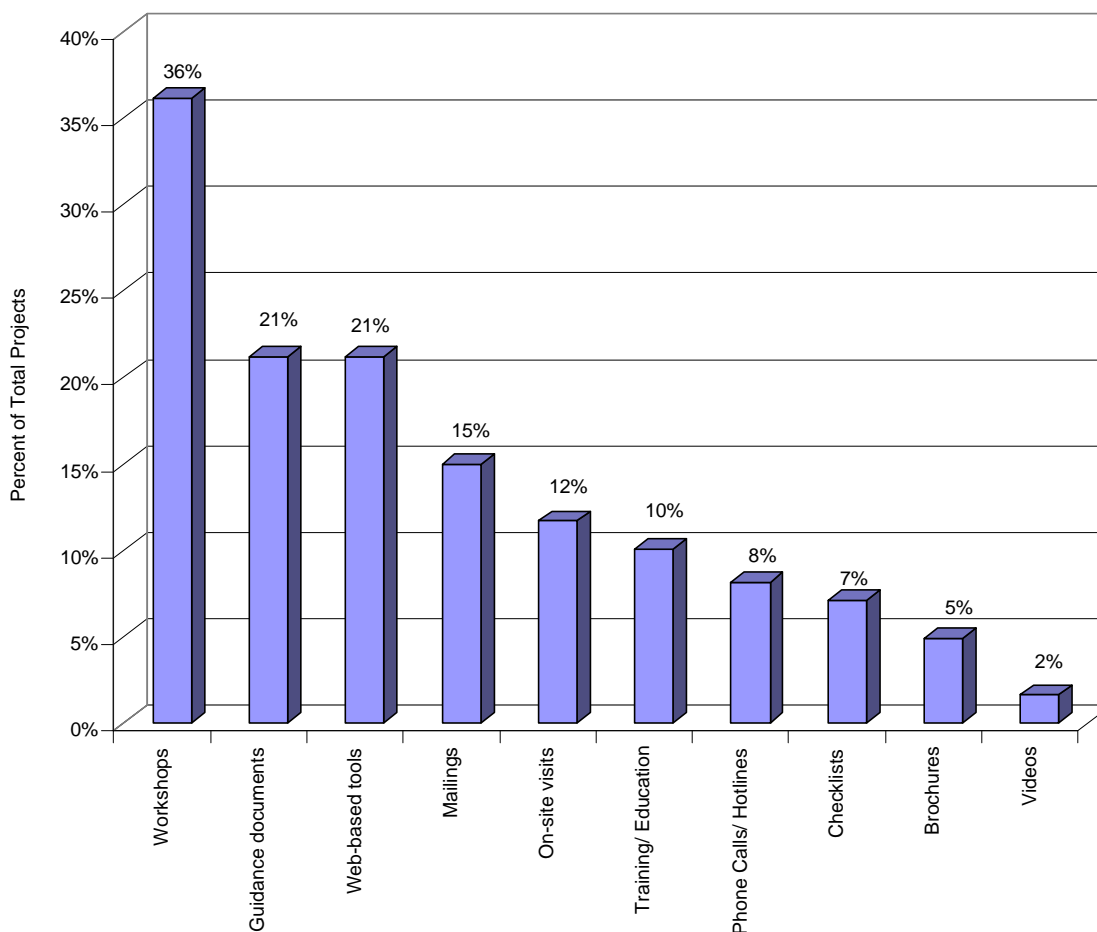

Other projects included in the Plan address Agency priorities identified by each media program office and OECA. Appendix B provides a summary of the Agency’s FY00-01 priorities that other compliance assistance providers may find useful in deciding what compliance assistance to offer to the regulated community.

In addition to the rule-related compliance guides, the Plan contains a variety of other compliance assistance approaches and tools. It includes the development of technical guides, regulatory self-audit checklists and protocols, applicability flowcharts, and expert systems. In addition, the Plan contains overviews of laws/regulations; best management practices; integrated projects; audit protocols; and outreach opportunities, such as training seminars, mailings, and new websites. It also includes the ten web-based Compliance Assistance Centers (Centers), with each Center serving a particular industry sector. The following chart describes the types of activities contained in the final Plan (See Chart 2).

## Chart 2: Top 10 Activity Types Addressed by FY01 Planned Compliance Assistance Projects

(shown as percentage of total projects)

Total: 368 projects

Source: the Compliance Assistance Planning Database (CAPD) as of February 1, 2001

### NOTES:

- *Workshops* includes meetings, symposiums, forums, and conferences. *Mailings* includes letters, notices and newsletters. *Training/Education* includes seminars. *Brochures* includes fact sheets.
- In the Compliance Assistance Planning Database the records for some of the projects designate more than one Activity Type. For example, some projects designate both Workshops and Web-based tools. These projects were included in each relevant individual category above.

***Workshops are the predominant Activity planned for FY 2001, with 133 of the projects followed by guidance documents and web-based tools at 78 projects each.***

## 4. ANALYSIS OF PROJECTS

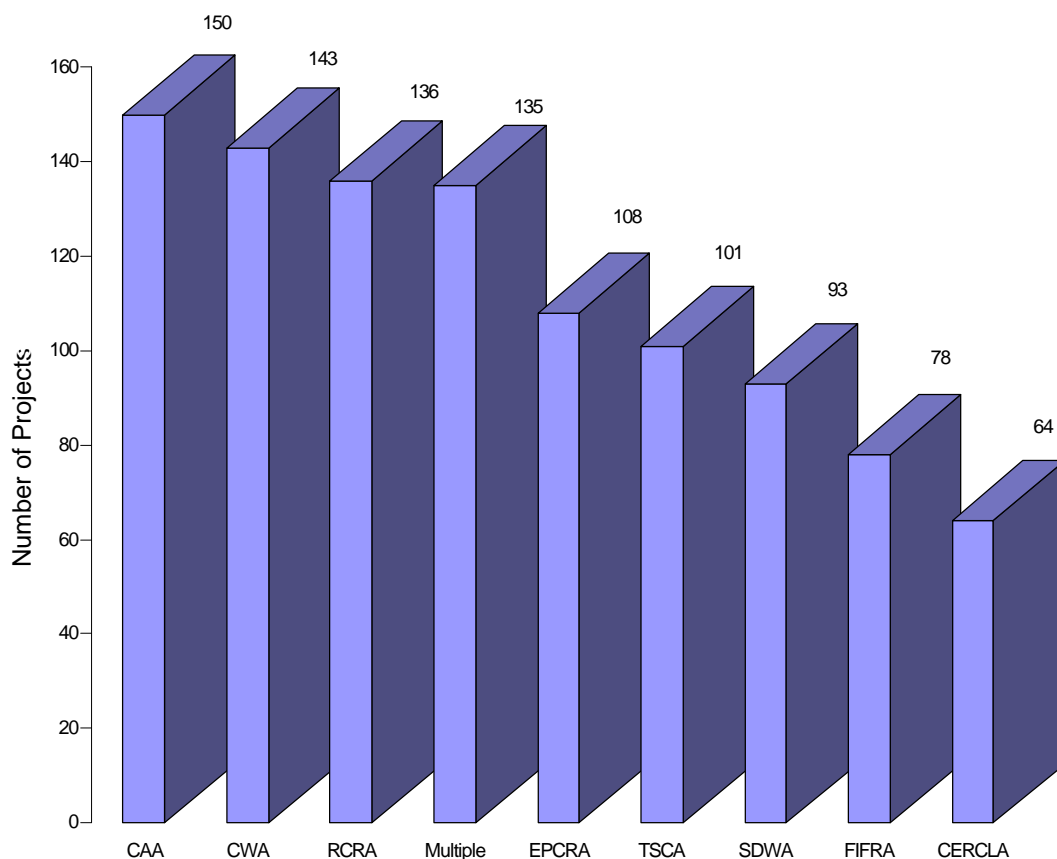

In examining the 368 activities and projects contained in the final FY2001 CA Plan, EPA has been able to reach some findings based on the information submitted by our HQ program and regional offices. Table 1 (see page 11) contains a narrative analysis of the projects in the Plan by sector. The other findings are depicted in the graphic charts contained in this report, and can be summarized as follows:

- The CAA (41%), CWA (39%), and RCRA (37%) are the predominant statutes addressed in the projects/activities in the Plan. In addition, 37% of projects address more than one statute, likely reflecting the sector-based nature of many activities. (See Chart 3)
- The most common chemical/pollutant category targeted by the activities in the Plan was metals, addressed by 7% of all projects. Other significant categories include pesticides, lead, air toxics, and VOCs. (See Chart 4).
- While a large number of projects (109) specify “multiple” sectors, half (50%) of all projects in the Plan address one of nine specific sectors, with federal facilities (39 projects), local governments (31), and tribal (23) sectors leading the way. (See Chart 5).
- The types of activities and projects contained in the plan varied widely, with workshops and conferences leading the way with 36%, followed by guidance documents and web-based-tools at 21% each. (See Chart 2).
- There is wide variation in the distribution of number of projects among HQ program and Regional offices. OECA has the largest number of HQ office projects with 50, followed by OPPTS with 35 and OEI with 24. Region VI has 32 projects, followed closely by Region II with 30, Region IV with 29, and Region IX with 26. (See Chart 1).

When reviewing these charts, it is important to note that comparing individual projects or the number of projects undertaken by a region or Headquarters office is difficult due to the fact that projects vary widely. Some projects are costly large-scale initiatives, such as the Compliance Assistance Centers, or labor intensive efforts, such as developing compliance guides for complex rules. Other may be one time meetings or seminars or ongoing work such as hotlines, mailings and tool distribution. Projects also vary in terms of their geographic reach and number of entities affected. To view a complete list of the projects summarized in these graphics, see Appendix C: Project Inventory Table.

**Chart 3: Federal Statutes Addressed by Planned FY01 Compliance Assistance Projects**

Total: 368 projects

CAA = Clean Air Act

CERCLA = Comprehensive Environmental Response,

Compensation, and Liability Act

EPCRA= Emergency Planning & Community Right-To-Know Act

FIFRA= Federal Insecticide, Fungicide and Rodenticide Act

Source: the Compliance Assistance Planning Database (CAPD) as of February 1, 2001

RCRA= The Resource Conservation and Recovery Act

SDWA= The Safe Drinking Water Act

TSCA=Toxic Substances Control Act

CWA= Clean Water Act

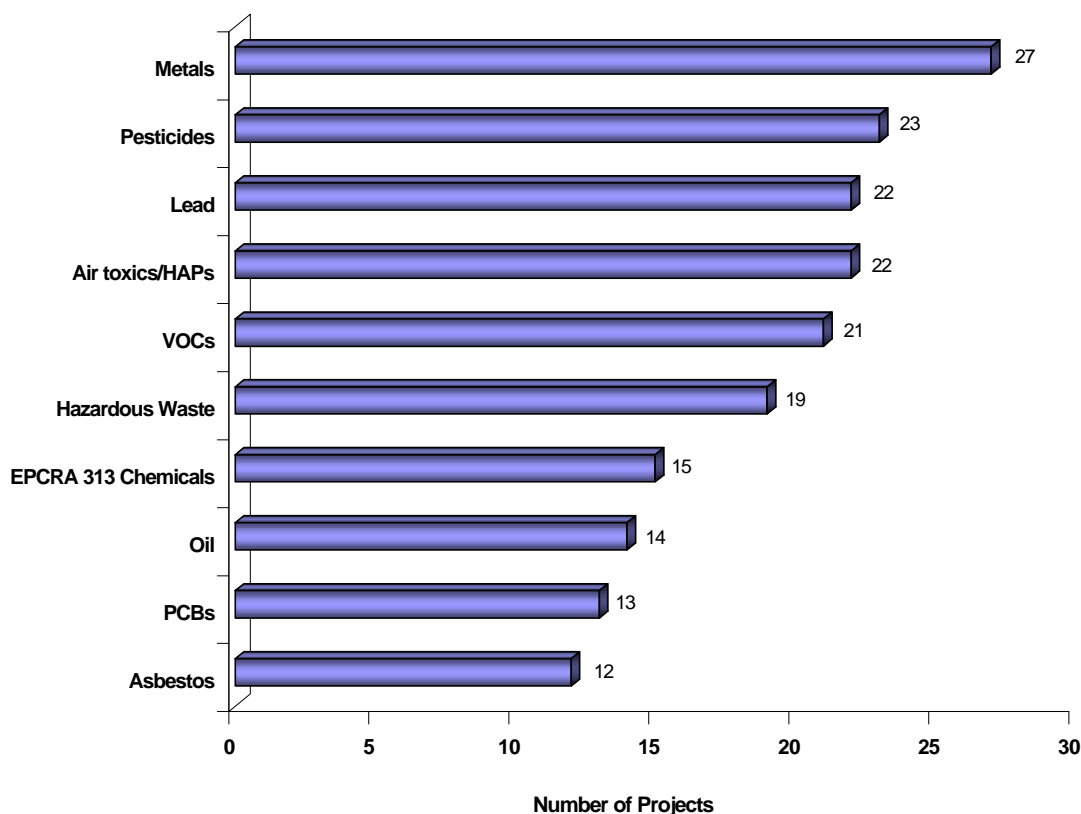

**NOTE:**

- "Multiple" refers to projects that address more than one statute. These projects are counted both in the specific statute count and also for the "multiple" category.

***The Clean Air Act (41%), Clean Water Act (39%) and the Resource Conservation and Recovery Act (38%) are the predominant statutes addressed by FY 2001 planned compliance assistance projects. In addition, one third of all projects (37%, or 135) address more than one statute. CERCLA applies to only 18% of the projects.***

**Chart 4: Top 10 Chemical/Pollutants Addressed by FY01 Planned Compliance Assistance Projects**

Total: 368 projects

Source: the Compliance Assistance Planning Database (CAPD) as of February 1, 2001

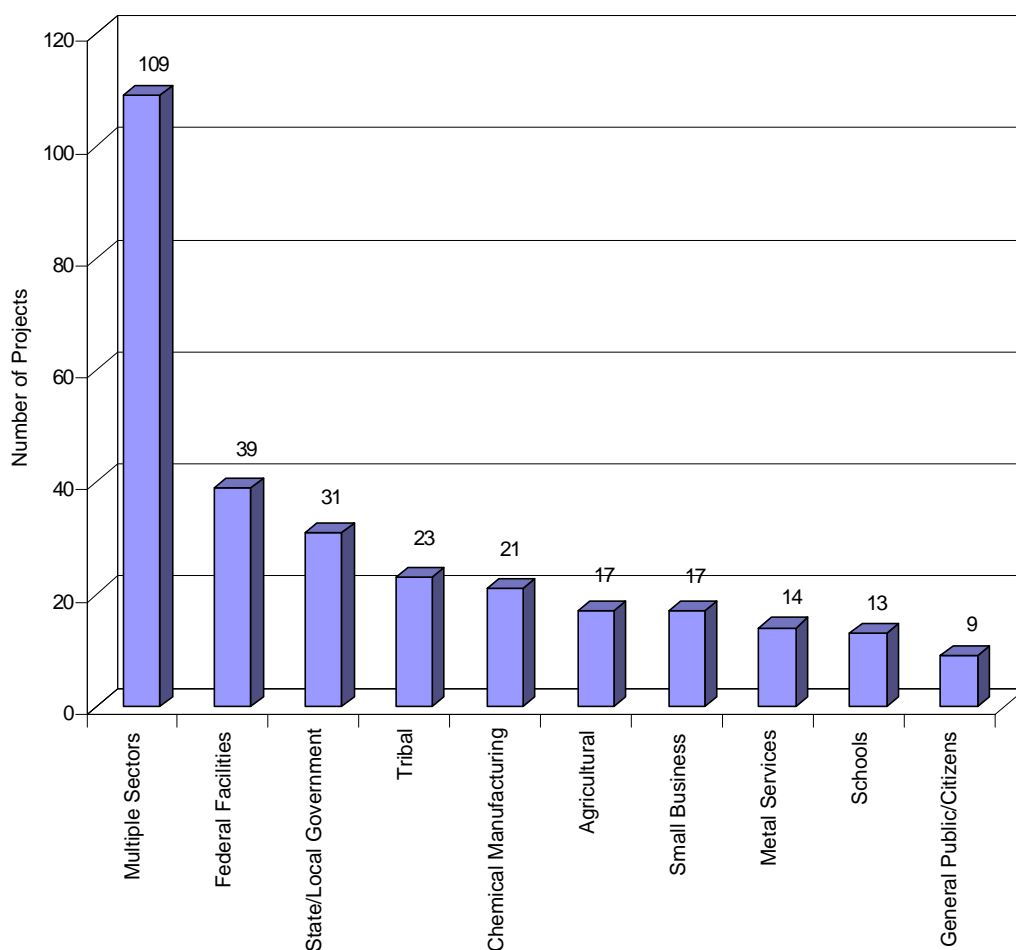

**NOTES:**

- *Metals* includes metal waste, heavy metals and single metals (mercury, cadmium, etc.) except lead.
- Not shown in this chart is the *multiple* chemical/pollutant category, of which there are 151 projects (40% of the total). Further, 102 projects (27% of the total) in the database did not specify any chemical/pollutant.
- “Chemical/Pollutant” refers to the chemical or pollutant that the project addresses.
- In the Compliance Assistance Planning Database the records for some of the projects designate more than one chemical/pollutant. For example, some projects designate “multiple” with a list of relevant chemical/pollutants following. These projects were included in each relevant individual category above.

***The largest number of projects addressed multiple chemical/pollutants (not shown in graph), followed by the ten chemical/pollutants shown above. Metals represents the largest group, with 7% of the total projects followed by pesticides, lead and air toxics with 6% each.***

**Chart 5: Top 10 Sectors Addressed by FY01 Planned Compliance Assistance Projects**

Total: 368 projects

Source: the Compliance Assistance Planning Database (CAPD) as of February 1, 2001

**NOTES:**

- “Sector” refers to the application of a project to a particular industrial or government sector.
- In the Compliance Assistance Planning Database the records for some of the projects designate more than one sector. For example, some projects designate both local and tribal government, or “multiple” with a list of specific sectors. These projects were included in each relevant individual category above.
- Forty (40) projects, or approximately 11% of the total projects in the database did not specify a sector.

***The largest number of projects addressed multiple sectors (30% of the total), followed by the nine specific sectors shown above in order of frequency. Federal facilities have the largest number of projects for a single sector, with nearly 11% of the total.***

**Table 1: Analysis of Projects by Sector**

The ten sectors addressed most frequently by projects in the Compliance Assistance Plan are listed in Table 1. This table provides a brief list of summary statistics for each group of projects.

Sector	Project Characteristics
<b>MULTIPLE SECTORS</b> (109 projects)	<p><b>Sector:</b> One third of projects address “multiple” sectors without listing any specific sectors. The remaining two thirds specify two or more particular sectors.</p> <p><b>Activity Type:</b> Approximately one-fourth (26) of the projects include workshops or conferences, and another one-fourth involve web sites. One-fifth of the projects involve guides.</p> <p><b>Statute:</b> The projects are equally distributed among RCRA, CAA and CWA (with 45, 41 and 41 projects each).</p> <p><b>Geographic Focus:</b> Slightly fewer than half of these projects are national in scope.</p>
<b>FEDERAL FACILITIES</b> (39 projects)	<p><b>Sector:</b> Almost all projects have regulated federal facilities as their central focus; 5 of 39 projects target other sectors as well.</p> <p><b>Statute:</b> The most commonly addressed statutes are CAA and CWA (21 projects each), and RCRA (20 projects), with 17 projects addressing all three.</p> <p><b>Activity Type:</b> The most frequent activity type is workshops (19 projects).</p> <p><b>Other:</b> Four (4) projects focus on radionuclide NESHAPS.</p>
<b>STATE/LOCAL GOVERNMENT</b> (31 projects)	<p><b>Sector:</b> More than half of these projects focus on multiple sectors (20 projects), including 9 projects that also address tribal issues and 5 that address chemical manufacturing.</p> <p><b>Statute:</b> The Clean Water Act is the most frequently addressed statute (21 of 31 projects). Eleven (11) of these projects also address RCRA.</p> <p><b>Chemical/Pollutant:</b> Five (5) projects concern pesticides, 5 concern asbestos, and 5 concern PCBs.</p> <p><b>Activity Type:</b> Websites (15 projects) and mailings (12 projects) are the most common activity types.</p>
<b>TRIBAL</b> (23 projects)	<p><b>Sector:</b> Thirteen (13) projects have a pure focus on the tribal sector. Nine (9) projects additionally target state or local government.</p> <p><b>Statute:</b> RCRA is the most frequently addressed statute (9 projects).</p> <p><b>Chemical/Pollutant:</b> Three (3) OPPTS projects focus on pesticides.</p> <p><b>Geographic Focus:</b> The majority of projects (17 of 23) are Regional in scope, with Region 9 accounting for one-third of all projects with a tribal focus.</p> <p><b>Audience:</b> State regulators are a targeted audience for a significant minority of projects (10 of 23).</p> <p><b>Activity Type:</b> The most common activity type is workshops (10 projects).</p>

Sector	Project Characteristics
<p><b>CHEMICAL MANUFACTURING</b> (21 projects)</p>	<p><b>Sector:</b> Nine (9) projects focus exclusively on chemical manufacturing; and 12 target additional sectors, including 5 projects addressing state and local governments.</p> <p><b>Statute:</b> The Clean Air Act (14 projects) , TSCA (13 projects), and RCRA (9 projects) are the most frequently covered statutes, with 8 projects addressing all three.</p> <p><b>Chemical/Pollutant:</b> Thirteen (13) projects target different types of toxic substances, including air toxics (6 projects) and lead (3 projects).</p> <p><b>Geographic Focus:</b> The majority of projects (17 of 21) have a national or multi-regional focus.</p> <p><b>Audience:</b> All but one project targets the regulated community, but many target additional audiences (15 target compliance assistance providers, 13 target state regulators, 12 target EPA staff).</p> <p><b>Activity Type:</b> Guides (6 projects) and websites (5 projects) are the most common activity type.</p>
<p><b>AGRICULTURE</b> (17 projects)</p>	<p><b>Sector:</b> Seven (7) projects focus on animal feeding operations (AFOs/CAFOs).</p> <p><b>Chemical/Pollutant:</b> Three (3) projects concern the use of pesticides.</p> <p><b>Statute:</b> The most commonly addressed statute is the Clean Water Act, with 12 projects, followed by FIFRA, with 7 projects.</p> <p><b>Activity Type:</b> Eight (8) of 17 projects involve workshops or meetings.</p>
<p><b>SMALL BUSINESS</b> (17 projects)</p>	<p><b>Statutes:</b> Seven (7) projects address all eight major statutes.</p> <p><b>Audience:</b> Over half these projects (10 of 17) target compliance assistance providers.</p> <p><b>Geographic Focus:</b> A majority of projects (12 of 17) are national in scope.</p> <p><b>Activity Type:</b> The most common activity type is guides (6 projects).</p>
<p><b>METAL SERVICES</b> including metal finishing and coating, but not fabrication (14 projects)</p>	<p><b>Statute:</b> Eight (8) projects address all of the following statutes: the Clean Air Act, EPCRA, RCRA, and the Clean Water Act.</p> <p><b>Activity Type:</b> Workshops are the most common activity type (9 projects), followed by websites (7 projects).</p>
<p><b>SCHOOLS</b> including K-12, colleges, universities and vocational schools (13 projects)</p>	<p><b>Statute:</b> Nine (9) projects address compliance related to TSCA. Five (5) projects address all three of the following statutes: the Clean Air Act, RCRA, and the Clean Water Act.</p> <p><b>Chemical/Pollutant:</b> Three (3) projects address asbestos, 3 address PCBs, and 3 focus on lab chemicals.</p> <p><b>Activity Type:</b> Workshops (7 projects) are the most common activity, followed by on-site visits (6 projects),</p>
<p><b>GENERAL PUBLIC/CITIZENS</b> including homeowners, communities, migrant workers (9 projects)</p>	<p><b>Statute:</b> Projects targeting the general public most frequently address compliance with TSCA (7 of 9 projects).</p> <p><b>Chemical/Pollutant:</b> Four (4) projects focus on lead-based paint.</p> <p><b>Activity Type:</b> Websites are the most common activity type (3 projects).</p>

## **5. STAKEHOLDER COMMENTS**

Stakeholder feedback was a vital part of the FY 2001 Plan's development. Through Forum 2000, the *Federal Register* notice and the CAAC recommendations, the Agency received comments on the draft Plan. Many Commentors stated that "this is a great first step" for compliance assistance strategic planning, and that EPA had provided "an excellent inventory of activities." Stakeholders also offered comments on how to improve future Plans. The following outlines the key issues raised by stakeholders and how EPA has begun to address them.

Stakeholders stressed the importance of directly involving all EPA regional and program offices in coordinating agency compliance assistance activities. The Agency has already taken a number of steps to improve coordination with the program and regional offices to draft the FY 2002 Plan. For example, development of the FY 2002 Plan will occur in conjunction with the Agency's FY 2002 planning and budgeting process. OECA has also expanded the Agency workgroup that develops the Plan to increase participation by program offices. Program and regional offices conducted sessions at the second national Compliance Assistance Providers Forum and other Regional meetings designed to share information and receive feedback on compliance assistance priorities.

Stakeholders called for EPA to use its compliance assistance resources more efficiently and to avoid duplication of effort. As discussed above, through the development of the final FY 2001 Plan, Agency offices and regions worked together to identify opportunities for collaboration on projects and activities. Similar collaboration efforts will continue in developing the FY 2002 Plan. EPA is hopeful that states and other assistance providers will provide increased feedback on the Agency's draft FY 2002 Plan to ensure that EPA uses its compliance assistance resources more efficiently.

Stakeholders expressed a need for EPA to work with them earlier to ensure that compliance assistance resources are focused on areas where they are most needed. In response to this concern, the Agency has changed the schedule for developing the FY 2002 Plan and redesigned its outreach efforts to receive stakeholder input prior to preparing the draft FY 2002 Plan. This outreach includes using Forum 2001 as a means to receive feedback on proposed compliance assistance activities and priorities prior to drafting the FY 2002 Plan. In addition, EPA regions will be scheduling meetings and conference calls between March and May 2001 to receive additional feedback on compliance assistance needs.

## **6. ACCESSING CURRENT AND FUTURE PLANS**

The FY 2001 Plan is accessible through the Agency's web-based National Compliance Assistance Clearinghouse (the Clearinghouse) ([www.EPA.Gov/Clearinghouse](http://www.EPA.Gov/Clearinghouse)), under the "Planned and Ongoing Activities" tab. The Clearinghouse provides quick access to the Plan using a variety of search topics to meet stakeholders' specific needs. Currently, the Plan is only searchable by EPA region and Headquarters office. All subsequent Plans will be searchable by a number of additional fields such as sector, pollutant, statute, geographic area, etc.

## **7. SCHEDULE FOR FY 2002 PLAN**

Development of the FY 2002 Plan will begin in Spring 2001, in conjunction with the Agency's FY 2002-03 MOA process. EPA will continue to work on enhancing the Plan as a strategic tool for targeting resources to the most significant Agency compliance priorities and assistance-related needs and seek ways to establish effective networks with compliance assistance providers, community groups. The Agency will consider the feedback it receives from Forum 2001 and other regional meetings as it develops the draft FY 2002 compliance assistance project inventory in mid FY 2001. The draft FY 2002 Plan will be issued for public comment in late Spring 2001 in both the *Federal Register* and on the Clearinghouse. Stakeholder input on the draft FY 2002 Plan will be shared with the program and regional offices for their consideration in finalizing their FY 2002 operating plans. After appropriations, the FY 2002 Plan will be finalized and placed on the Clearinghouse in the first quarter of FY 2002.

## APPENDIX A

### REGULATION-SPECIFIC COMPLIANCE ASSISTANCE TOOLS

#### Information for the Final Fiscal Year 2001 Compliance Assistance Activity Plan as of February 16, 2001

The table below includes information on federal regulations for which EPA plans to develop compliance guides or self-audit checklists in 2001. Compliance guides are being developed because these regulations have either: (1) a significant economic impact on a substantial number of small entities as defined under the Small Business Regulatory Enforcement Fairness Act (SBREFA); or (2) an economic impact of \$100,000,000 or more on companies and/or government facilities as outlined in EPA's *Aiming for Excellence* report.

These thirteen specific rules are listed in this table because they are either expected to be final in 2001 or are already final rules and will have compliance guides completed in 2001. Seven of the thirteen listed regulations are expected to be published as final rules in the Federal Register and have compliance guides completed in 2001. Six of the thirteen listed regulations were published and final prior to 2001 but will have their compliance guides completed in 2001. The table does not, therefore, list the potential universe of SBREFA and economically significant regulations for which future compliance guides may be developed. This table updates the information on SBREFA and Economically Significant rules listed in the draft Plan by removing regulations which are not expected to be final in 2001 or which are no longer considered economically significant.

The table is current as of February 16, 2001. The list of regulations is not final and is continually changing based on alterations to a regulations projected publication date and further economic analysis.

## APPENDIX B

### FY 2001 EPA PRIORITIES

The EPA priorities table presents the environmental areas that the Agency is focusing on at a national level for FY 2001. These priorities were identified through the Agency's planning and budget process between EPA Headquarters and Regions. Through stakeholder feedback and discussions between EPA Headquarters and the regional offices, the Agency develops agreements addressing each of following Agency program offices: 1) Office of Air and Radiation; 2) Office of Prevention, Pesticides and Toxic Substances; 3) Office of Water; 4) Office of Solid Waste and Emergency Response; and 5) Office of Enforcement and Compliance Assurance.

<b>Office of Air and Radiation</b>
Implement the National Ambient Air Quality Standards (NAAQS) for ozone and particulates.
Create Clean Air Partnership Fund to provide opportunities for cities, states and tribes to partner with the private sector, federal government, and each other to provide healthy air to local citizens.
Set new Tier II mobile source emission standards.
Coordinate the Transportation Equity Act for the 21 <sup>st</sup> Century (TEA-21) (the most recent surface transportation bill) and the Clean Air Act.
Move toward a risk-based air toxic program.
Continue progress on making Kyoto Protocol acceptable for ratification.
Help protect children from indoor air hazards.
<b>Office of Prevention, Pesticides, and Toxic Substances</b>
Chemical Right-to-Know — conduct program outreach, facilitating dialogue among regional chemical manufacturers, stakeholders, and OPPT.
Lead — assist in the development of lead-based paint training, accreditation, and certification programs; implement lead-based paint regulations; conduct public outreach and education.
Pollution prevention — promote integration of pollution prevention strategies into regional, state, and tribal programs.
Ground water pesticide management plans.
Pesticide safety (worker protection).
Urban pesticide misuse.

<b>Office of Water</b>
Watershed restoration action strategies and TMDLs.
Animal Feedlot Strategy.
Storm water Phase II.
Smart growth policies; implement measures to preserve green space and other environmentally critical areas.
Sanitary sewer overalls.
Permit backlog.
Water quality standards program modernization.
Upgrade state non-point source pollution control programs.
Protect water resources in Indian Country.
Reinvent Clean and Safe Water programs.
Release Microbial and Disinfectants/Disinfection Byproducts rules.
Release Consumer Confidence Report regulation.
Release Contaminant Candidate List.
The Drinking Water Revolving Fund.
Safe drinking water capacity development guidance.
Public Water System Operator certification guidance.
<b>Office of Solid Waste and Emergency Response</b>
RCRA — promulgate tailored standards governing remediation waste, expedite RCRA Corrective Action program cleanups, and use innovative approaches to move cleanups forward.
Superfund — complete construction at National Priorities List (NPL) sites, implement Superfund reforms, maximize potentially responsible parties' (PRP) participation in conducting and funding response actions, promote fairness in the enforcement process, and recover costs from PRPs.
Brownfields — identify and reduce barriers in assessing, cleaning up and reusing formerly contaminated properties.

Federal Facilities — promote construction completions, empower community stakeholders through partnership agreements and advisory boards, and promote the reuse and redevelopment of Federal facilities.
Oil Spills — bring additional facilities into compliance with Spill Prevention Control and Countermeasure requirements.
Underground Storage Tanks — promote compliance with the requirements for upgrading, replacing, or closing Underground Storage Tanks (USTs); accelerate cleanup initiation and completion; and promote program delegation to states.
<b>Office of Solid Waste and Emergency Response, cont.</b>
Emergency Preparedness and Prevention — establish state, local, and tribal chemical accident release programs in meeting Clean Air Act requirements and public access to community right-to-know.
Indian Country — infrastructure development assistance for hazardous waste, solid waste, and underground storage tanks management.
<b>Office of Enforcement and Compliance Assurance</b>
Clean Water Act — wet weather areas (Combined Sewer Overflow Policy, Sanitary Sewer Overflow Enforcement Management System, National Concentrated Animal Feeding Operations Sector Strategy, and storm water regulations).
Safe Drinking Water Act — microbial rules.
Clean Air Act — New Source Review/Prevention of Significant Deterioration — particularly focusing on coal-fired electric utility industry.
Clean Air Act — Air Toxics (Regions to adopt 1-2 Maximum Achievable Control Technology (MACT) standards per year in which to become national experts).
Resource Conservation and Recovery Act — permit evaders.
Petroleum Refining Sector — focus on compliance monitoring and enforcement-related activities.
Metal Services (Electroplating and Coating) Sector — develop a national enforcement and compliance sector strategy.

## APPENDIX C

### PROJECT INVENTORY TABLE

Sorted by Sector

This table presents the entire inventory of 368 projects identified by the Agency for the FY 2001 Compliance Assistance Activity Plan (Plan). The projects are listed alphabetically by sector and display nine fields: 1) sector, 2) project title, 3) project description, 4) statute, 5) chemical/pollutant, 6) geographic focus, 7) audience, and 9) contact.

When reviewing the table please note the following:

1. All offices leading compliance assistance efforts provided information on their projects that will continue or commence in FY 2001. Because this is a first-time Agency-wide planning effort, we believe that not all the projects are included in this table for a variety of reasons.
2. All offices providing project information completed a series of data fields. Not all the data fields were interpreted in the same way, however; in some instances, not all the fields were completed. In some of these instances, project information within the sector, geography, and chemical/pollutant fields was modified to display information consistently. Fields where information was not provided were designated as N/D.
3. “Geographic focus” refers to the application of the project as it relates to the country. For example, a national project, although being led by a Region or particular office, may be part of an Agency-wide national priority.
4. “Sector” refers to the application of a project to a particular industrial, government, or public sector (including “tribes,” “federal facilities,” and “small business”). Some projects identify multiple sectors while others do not specify a sector at all. Some projects that identify multiple sectors include a list of specific sectors in parentheses. In cases where a sector was not designated, N/D was entered into that field.

## Appendix C: Planned Compliance Assistance Projects FY01

### Sorted by Sector

Sector	Project Title	Project Description	Statute (see key below)								Chemical/ Pollutant	Geographic Focus	Audience				Contact Info
			A	C	E	F	R	S	T	W			E	S	R	N	
Agricultural (CAFO)	Concentrated Animal Feeding Operations (CAFOs)	Mailing/distributing Fact Sheets for CAFOs in ID, OR, & WA; respond to phone calls/emails regarding R10's CAFO program; presentations by EPA R10 Representatives at meetings/workshops	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	Multiple (fecal coliform, BOD, nutrients, TSS)	Region 10	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	Joseph Roberto Office of Water NPDES Compliance Unit (OW-133), 206/553-1669
Agriculture	National Agriculture Compliance Assistance Center (Ag Center)	The Ag Center, with the support of USDA, serves as the "first stop" for those in the agricultural community who need information on compliance with environmental requirements and pollution prevention.	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	Multiple	National	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	Ginah Mortensen Office of Compliance, OECA 913-551-5211
Agriculture	Sector Notebook: Profile of the Agricultural Livestock Production Industry	Publication that provides general interest information on the agricultural livestock production industry	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	Multiple	National	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	Ginah Mortensen Office of Compliance, OECA 913-551-5211
Agriculture	Sector Notebook: Profile of the Agricultural Production Industries: Crops, Greenhouses/Nurseries, and Forestry	Publication that provides general interest information on agricultural crop, nursery, greenhouse, and forestry production.	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	Multiple	National	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	Ginah Mortensen Office of Compliance, OECA 913-551-5211
Agriculture	Executive Order on developing and promoting biobased products and bioenergy.	Developing a strategy to implement the E.O. mandating biobased products.	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	Multiple	National	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	Marc Matthews Solid Waste & Pollution Pollution Branch 913.551.7517
Agriculture	Educational Events to Explain EPA's Responsibility to Implement Laws Affecting Agriculture	Educational Events to Explain EPA's Responsibility to Implement Laws Affecting Agriculture -- focus on almonds, cotton, and dairies	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	Pesticides	Region 9	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	LoriAnn Thrupp (415) 744-1983 Ag Initiative/Cross Media
